SUMMARY

Data Analyst with 3+ years of analytics experience building end-to-end solutions across SQL, Python, Power BI, and Azure — from cloud ETL pipelines and star-schema warehouses to ML-driven dashboards. Delivered a fraud-detection model (AUC 0.957, 90% recall) on 558K healthcare claims and a live mutual-fund analytics platform covering 14K+ schemes. Microsoft PL-300, AZ-900, DP-900 and AWS Cloud Practitioner certified, with BFSI domain experience.

TECHNICAL SKILLS

- **Languages & Querying:** SQL (window functions, CTEs, query optimization), Python (pandas, NumPy, scikit-learn)
- **BI & Visualization:** Power BI (PL-300), DAX (40+ measures), data modeling, star schema, Streamlit, Excel (Advanced)
- **Cloud & ETL:** Azure Data Factory, Blob Storage, Azure PostgreSQL, ETL pipeline design, AWS (fundamentals)
- **Databases:** PostgreSQL, MySQL, Supabase; dimensional modeling, indexing, CTE-based deduplication
- **ML & Tools:** Logistic Regression, XGBoost, K-Means, Prophet forecasting, Git, n8n automation

EXPERIENCE

Independent Data Analyst

Aug 2024 – Present

Finonus Capital | Remote

- Built an NSE-universe equity research model covering 2,272 stocks across 23 industries as a 26-sheet Excel workbook, used to shortlist products for client recommendation.
- Ran overlap and concentration reviews across client portfolios and built the Power BI dashboards behind product, portfolio and management reporting, replacing a manual month-end spreadsheet consolidation.
- Automated lead capture and CRM follow-up with n8n, removing manual re-entry from the advisory enquiry pipeline.

Academic Administrator & Computer Teacher

Jul 2022 – Jul 2024

Bhartia International School | Rajaldesar, Rajasthan

- Digitised records for a 500+ student institution and built the fee-invoice and report-card workflow used each academic term.

Digital Marketing Executive — Shriram General Insurance, Sikar

Dec 2021 – May 2022

PROJECTS

Healthcare Provider Fraud Detection

Stack: Python, scikit-learn, Azure Data Factory, PostgreSQL, Power BI | [github live](#)

- Engineered a fraud-detection pipeline over 558K Medicare claims (Azure Blob to ADF to PostgreSQL, 9 tables / 2.43M rows), building 28 SQL features including diagnosis-stuffing rate and claims-velocity signals.
- Selected Logistic Regression (0.9573 AUC, 90.1% recall) over XGBoost (65.4%) and Random Forest (61.2%) on recall and explainability grounds, exposing \$295.68M in a 226x fraud concentration.

Mutual Fund Analytics Platform

Stack: Python, Azure, PostgreSQL, Prophet, Streamlit, Power BI | [github live](#)

- Architected a Python ETL pipeline ingesting live NAV for 14,384 schemes across 51 AMCs into a star schema (5 dim + 4 fact) on Azure PostgreSQL, computing CAGR, Sharpe, Sortino, Beta and max-drawdown for 16 benchmark funds.
- Chose Prophet over ARIMA and LSTM for NAV forecasting on seasonality and interpretability grounds, and validated returns against published index data.

Olist E-Commerce Analytics

Stack: PostgreSQL, Azure Data Factory, Power BI, DAX, AI visuals | [github Live](#)

Designed a star-schema warehouse (4 dim + 1 fact, 112,650 order items) and a 40+ measure DAX model, then traced a retention overstatement to order-level grain: customer_unique_id exposed a ~97% one-time-buyer reality.

QueryScratch — live SQL practice platform (free for students)

Stack: SQL, Supabase (Postgres, RLS), sql.js (WASM SQLite), Next.js, TypeScript | [queryscratch.com](#)

- Authored 500+ SQL practice questions across window functions, CTEs, subqueries and indexing — each with a runnable schema, seed data and a validated reference answer — and shipped the live platform solo.

EDUCATION

B.Com, Accounting and Finance — University of Calcutta, Kolkata

2017 – 2020

CERTIFICATIONS

Microsoft PL-300 (Power BI Data Analyst), DP-900, AZ-900 | AWS Cloud Practitioner | CFA Institute Investment Foundations
